

NSW Climate Change Fund - Water Grants

The \$340 million Climate Change Fund has been established by the NSW Government to help householders, businesses, schools and government save water and energy. It is administered by the Department of Environment and Climate Change NSW.

The Green Business Program under the NSW Climate Change Fund is now open. Applications are invited for projects which will save water, energy and greenhouse gas emissions in business operations in NSW. There are two funding streams – market transformation and direct measures. [More](#)
